SUMMARY:

Mid-level Backend Engineer specializing in Spring Boot with hands-on experience building backend services and working with microservices-oriented architectures.

WORK EXPERIENCE:

- Backend Engineer (Spring Boot)

Smart Software Solution - Oct 2025 – Present

- Developing and maintaining high-performance, enterprise and government-level systems.
- Architected a CRUD Base Layer using Java 21 and Spring Boot, automating boilerplate code and centralizing error handling/response systems, with dynamic database querying and soft-deletion features, significantly reducing development time for new features.

TECHNICAL SKILLS:

- **Backend:** Java, Spring, Spring Boot

- **Web:** REST, GraphQL, Websockets

- **DevOps:** Linux, Docker, Git, CI/CD pipelines

PROJECTS:

- **Forge:** An extensible, plugin-based CLI tool for Java developers, focused on modularity and scalability..

- Designed as a modular system where functionality is added via plugins
- Focused on scalability, extensibility, and clean internal architecture
- Consists of multiple sub-projects (plugins) under a unified core
- Plugins:
 - o Offline Postman replacement
 - o Plugin manager to update, download and remove plugins
 - o Code generation tools to generate files, projects, and boilerplate code

EDUCATION & STUDY:

- **Damascus University:** Bachelor's Degree in Information Technology Engineering (ITE) (2022-2027)
